**Footnotes**

1. Percentile specifies the percentage of answers that were less than or equal to your score. For example, if you have a percentile of 45 for question 3, then 45 percent of the other courses' evaluations had a class mean less than or equal to your class mean for question 3.
2. Standard Deviation is a measure of the dispersion of the students' responses. Lower standard deviation indicates more agreement among responses, and higher standard deviation indicates less agreement among responses.
3. N/A and missing responses were not included in the computation of scores or percentiles.
